CAREER OBJECTIVE

To contribute and enhance my skills in developing enterprise-level technological solutions for our clients and achieving the goals of the company.

ABOUT ME

I'm a Software Engineer with over 17 years of experience developing small-business to enterprise-level eCommerce websites.

- Building professional-looking websites to enhance the company's online brand
- Use AI tools in building websites and web applications for improved productivity
- Develop custom features to meet client's custom business requirements
- Initiate online marketing strategies to reach the company's business goals

Adept at Next.js, Drupal, and WordPress development with in-depth technical skill in:

- Responsive theme development
- Custom module and plugin development
- Enhance UI/UX for better user experience
- Web Service API development and integration

With a positive attitude and deep desire to build websites that last.
