CAREER OBJECTIVE

To contribute and enhance my skills in developing enterprise-level technological solutions for our clients and achieving the goals of the company.

ABOUT ME

I'm a Software Engineer with good experience in developing Small-Business to Enterprise-Level eCommerce websites.

- Building professional-looking websites to enhance the company's online brand
- Develop custom features to meet client's custom business requirements
- Initiate online marketing strategies to reach the company's business goals

Adept at Drupal and WordPress development with in-depth technical skill in:

- Responsive Theme development
- Custom Module/Plugin development
- Enhance UI/UX for better user experience
- Web Service API development and integration

With positive attitude and deep desire to build websites that last.

PROJECTS

I lead in development and maintenance on the following sites:
